

Delta Fabricating designs and manufactures a wide variety of custom enclosures to protect sophisticated electrical and electronic controls, instruments and components from water, dust, dirt, oil and other environmental conditions. With a state-of-the-art production facility, extensively trained engineers and technicians, and the highest quality materials, Delta consistently meets customers' toughest challenges with quality, creativity and value.

### Custom Enclosures

Delta designs and builds enclosures to your specifications. Everything from metal selection, custom cut holes, and tailor made windows, hinges and doors to paint color. We stock and manage inventory for our OEM customers.

### Custom-Length Wire Way

Custom-length wire way ensures proper protection of cable runs, providing a clean and safe way of connecting systems.

### Standard Enclosures

Junction boxes, sub-panels, and UL/NEMA-style enclosures. Everything from single and double door wall mount to double, triple, quadruple door floor mount. Push button enclosures, sub-panels for enclosures, consoles, instrument enclosures, and terminal cabinets.

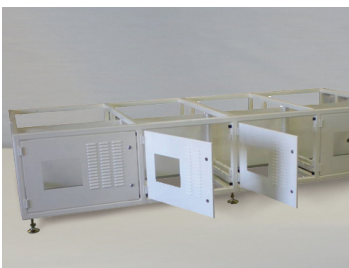

### Weldments and Frames

Welded rooms, machine frames and skins, and control rooms built to your specifications.

### Bent Shapes

Small and large custom bent shapes available in desired color and quantity.

Delta Fabricating Co. produces custom enclosures, standard enclosures, frames, weldments and bent shapes for every application. Whether the project calls for a single customized panel, or a continuous stream of enclosures, Delta has the professional-grade solutions to fit your unique needs. We stock custom enclosures and manage inventory for our OEM customers. We also stock thousands of material SKUs for quick, custom turnarounds. Our standard materials are available in stainless steel, galvanized steel, mild steel, or aluminum in your required gauge, with powder-coat or wet-paint colors to your requested specifications. Read on to learn more about our deep production skillsets.

### Infrastructure

- 56,000 Sq. Ft. Facility
- Managed Inventory
- Seasoned Metal Fabricators

### Specialties

Custom weldments, consoles, instrument enclosures, racks, assemblies, multi-door units, prototypes, terminal cabinets, special size units, and custom drilled and tapped subpanels

### Metals

Mild steel, stainless steel, galvanized steel, and aluminum

### Production Features

Louvers, cutouts, holes, windows, forming, blanking, grinding, nibbling, notching, piercing, shearing, welding, and straight-lining

### Services

In-house paint facility, silk screening, CNC programming and fabricating

### Certifications

UL 508 listed, NEMA, JIC and IP66 rated
